

March 19, 2020

To Our Residents,

The Marion County Public Health Department has informed us that a recent short-term rehab resident tested positive for COVID-19 after leaving our facility. We appreciate our partners at the health department alerting our organization, the dialysis center, and the hospital where the patient had received treatment, as it is unknown where they may have contracted the virus.

No other residents or employees on campus are presenting symptoms and we continue to exercise an abundance of caution in preventing COVID-19 among our community. We are following guidelines issued by the CDC, Indiana State Department of Health, and the Marion County Department of Health, and will continue to be vigilant with our preventative measures and monitoring.

Sincerely,

Shelley Rauch  
Executive Director  
Ext. 3500
