

Westminster Village North

Interim COVID-19 Visitation

Policy:

Westminster Village North (WVN) will allow visitation of all visitors and non-essential health care personnel and can be conducted through different means based on WVN's structure and residents' needs, such as in resident rooms, dedicated visitation spaces, and outdoors. The visitation will be person-centered, consider the resident's physical, mental, and psychosocial well-being, and support their quality of life. Exceptions will be in accordance with current CMS directives and CDC recommendations, or as directed by state government (whichever is more stringent).

Definitions:

"Fully Vaccinated" refers to a person who is ≥ 2 weeks following receipt of the second dose in a 2-dose series, or ≥ 2 weeks following receipt of one dose of a single-dose vaccine.

"Unvaccinated" refers to a person who does not fit the definition of "fully vaccinated," including people whose vaccination status is not known.

Policy Explanation and Compliance Guidelines:

1. The Infection Preventionist will monitor the status of the COVID-19 situation through the CDC website and local/state health department and will keep WVN leadership informed of current directives/recommendations and the need for restricting visitation if indicated.
2. WVN will communicate this visitation policy through multiple channels. Examples include signage, calls, letters, social media posts, emails, and recorded messages for receiving calls.
3. Non-essential staff, as designated in emergency preparedness plans, will be notified through routine and emergency communication procedures for staff.
4. The core principles of COVID-19 infection prevention will be adhered to and as follows:
 - a. Visitors who have a positive viral test for COVID-19, symptoms of COVID-19, or currently meet the criteria for quarantine, should not enter the facility. WVN will screen all who enter for these visitation exclusions.
 - b. Visitors will be counseled about their potential to be exposed to COVID-19 in WVN.
 - c. Hand hygiene, using an alcohol-based hand rub, will be performed by the resident and the visitors before and after contact.
 - d. A well-fitting cloth mask, facemask, or respirator covering the mouth and nose, will be worn at all times except in certain situations.

- e. Physical distancing at least six feet between persons will be observed.
 - f. Instructional signage throughout WVN and proper visitor education on COVID-19 signs and symptoms, infection control precautions, and other applicable WVN practices will be conducted.
 - g. Cleaning and disinfection of highly touched surfaces in the facility and in designated visitation areas after each visit will be performed.
 - h. Staff will adhere to the appropriate use of personal protective equipment (PPE).
 - i. WVN will utilize effective strategies of cohorting residents (e.g., separate areas dedicated to COVID-19 care).
 - j. WVN will conduct resident and staff testing as per current CMS guidance.
 - k. Physical barriers (e.g., clear Plexiglass dividers, curtains) will be used to ensure privacy and reduced risk of transmission during in-person visits.
 - l. Visitors who are unable to adhere to these principles of COVID-19 infection prevention will not be permitted to visit or will be asked to leave.
5. Outdoor visitation will be conducted in a manner that reduces the risk of COVID-19 transmission as follows and is the preferred method when the resident and/or visitor are not fully vaccinated against COVID-19:
- a. Visits will be held outdoors whenever practicable and will be facilitated routinely barring weather conditions, a resident's health status or WVN's outbreak status.
 - b. Resident should wear well-fitting source control (if tolerated), maintain physical distancing from others, and not linger in common spaces when moving from their rooms to the outdoors.
 - c. WVN will have an accessible and safe outdoor space (*designate space*) in which to conduct outdoor visitation.
6. Indoor visitation will be conducted in a manner that reduces the risk of COVID-19 transmission based on the following guidelines:
- a. WVN will allow indoor visitation at all times and for all residents and will not limit the frequency and length of visits, the number of visitors, or require advance scheduling of visits.
 - b. Visits will be conducted in a manner that adheres to the core principles of COVID-19 infection prevention and does not increase risk to other residents.
 - c. Physical distancing will be maintained during peak times of visitation.

- d. Visitors should still wear source control and physically distance from other residents, staff, and other visitors that are not part of their group on WVN campus regardless of vaccination status.
 - e. Visitors will go directly to the resident's room or designated visitation area.
 - f. A visit in the resident's room will not be conducted if the resident's roommate is unvaccinated or immunocompromised (regardless of vaccination status), but if unable, WVN will allow in-room visitation while adhering to the core principles of infection prevention.
 - g. If WVN's county (Marion) COVID-19 community level of transmission is substantial to high, all residents and visitors, regardless of vaccination status, should wear face coverings or masks and physically distance, at all times.
 - h. If WVN's county COVID-19 community level of transmission is low to moderate, residents and visitors should wear face coverings or masks and physically distance, particularly if either of them is at increased risk for severe disease or are unvaccinated.
 - i. If the resident and all of their visitor(s) are fully vaccinated and the resident is not moderately or severely immunocompromised, they may choose not to wear face coverings or masks and to have physical contact.
 - j. For residents who are on transmission-based precautions or quarantine, visits may occur in the resident's room and the resident should wear a well-fitted facemask (if tolerated). Visitors will be made aware of the potential risk of visiting and precautions necessary in order to visit and should adhere to the core principles of infection prevention.
 - k. Residents regardless of vaccination status, may choose to have close contact (including physical touch) based on their preferences and needs, but unvaccinated residents (or their representatives) and their visitors should be advised of the risk of physical contact prior to the visit.
7. When a new case of COVID-19 among staff or residents is identified, WVN will immediately begin an outbreak investigation and adhere to CMS regulations and guidance for COVID-19 testing, including routine unvaccinated staff testing, testing of individuals with symptoms and outbreak testing. See *Coronavirus Testing Policy*.
8. Visits will be allowed during outbreak investigations, but visitors will be made aware of the potential risk of visiting during the outbreak investigation and adhere to the core principles of infection prevention. If visiting, during this time, residents and their visitors should wear face coverings or masks during the visits, regardless of vaccination status, and visits should ideally occur in the resident's room.

9. Visitors will be notified about the potential for COVID-19 exposure on WVN campus (e.g., appropriate signage regarding current outbreaks), and adhere to the core principles of COVID-19 infection and prevention, including effective hand hygiene and use of face coverings.
10. Compassionate care visits and visits required under the federal disability rights laws will be allowed at all times. If the resident is in transmission-based precautions or quarantine, or an unvaccinated resident is in a county where the level of community transmission is substantial or high in the past 7 days, the resident and visitor(s) should be made aware of the potential risk of visiting and the visit should take place in the resident's room.
11. Ombudsmen who plan to visit a resident in transmission-based precautions or quarantine, or an unvaccinated resident in the facility in a county where the level of community transmission is substantial or high in the past 7 days, the ombudsman and resident, will be made aware of the potential risk of visiting and the visit should take place in the resident's room.
12. Alternative communication methods (phone or other technology) may be used if the resident or Ombudsman program requests it in lieu of an in-person visit.
13. Visitor testing may be offered, if feasible, at WVN in counties with substantial or high levels of community transmission. If WVN does not offer testing, WVN will encourage visitors to be tested on their own before coming to WVN (e.g., within 2-3 days).
14. WVN may ask about a visitor's vaccination status, however, visitors will not be required to be tested or vaccinated (or show proof of such) as a condition of visitation. If the visitor declines to disclose their vaccination status, the visitor should wear a face covering or mask at all times.
15. All healthcare workers will be permitted to come into WVN as long as they are not subject to a work exclusion or showing signs or symptoms of COVID-19. This includes personnel educating and assisting in resident transitions to the community.
16. Advise any visitors to monitor for signs and symptoms of respiratory illness and report to WVN if symptoms are evident within 14 days after visiting WVN.
17. Communal activities (including group activities, communal dining, and resident outings):
 - a. Communal activities and dining may occur, but regardless of vaccination status, everyone should wear a face covering or mask while in the communal areas of WVN.
 - b. Residents are permitted to leave WVN campus as they choose. WVN will remind the resident and any individual accompanying the resident to follow all recommended infection prevention practices including wearing a face covering or

mask, physical distancing, and hand hygiene and to encourage those around them to do the same.

- c. Upon the resident's return, WVN will take the following actions:
 - i. If the resident or family member reports possible close contact to an individual with COVID-19 while outside WVN, test the resident for COVID-19, regardless of vaccination status. Place the resident on quarantine if the resident has not been fully vaccinated.
 - ii. If the resident develops signs or symptoms of COVID-19 after the outing, test the resident for COVID-19 and place the resident on Transmission-Based Precautions, regardless of vaccination status.
- d. WVN may opt to test unvaccinated residents without signs or symptoms if they leave the nursing home frequently or for a prolonged length of time, such as over 24 hours.
- e. WVN may consider quarantining unvaccinated residents who leave WVN, if based on an assessment of risk, uncertainty exists about the adherence or the adherence of those around them to recommended infection prevention measures.
- f. WVN will monitor residents for signs and symptoms of COVID-19 daily.
- g. Residents who leave WVN for 24 hours or longer should be managed as a new admission or readmission and follow current CDC guidance. See *Novel Coronavirus Prevention and Response Policy*.
